

Are you letting **UNCERTAINTIES** creep into treatment planning?

The CT-to-density table can be negatively influenced by the choice of phantoms.¹

Select a phantom that has full depth tissue mimicking rods made of material exquisitely matched to ICRU-44.

Advanced Electron Density Phantom

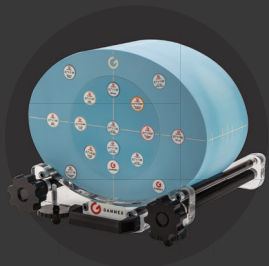

Accurately calibrate your CT for treatment planning, with the right partner and tools. The Gammex Advanced Electron Density Phantom simplifies your CT to Electron Density-related workflows.

Our tissue mimicking material exquisitely matches the medical standards for human tissue mimicking materials, as defined by ICRU-44 and ICRP.

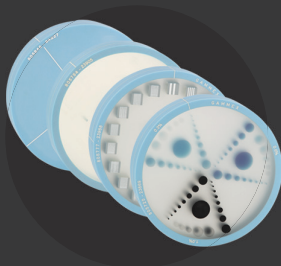

INDEPENDENTLY VERIFY YOUR CT SOLUTIONS

with the Right Partner & Tools

Advanced Electron Density Phantom

Exquisite match to ICRU-44 and ICRP supports accurate, appropriate calibration

Advanced iqModules™

Expand CT QA with unparalleled image quality testing capabilities

CTDI Phantoms

Measure absorbed dose and monitor scanner output for Dose Index QA

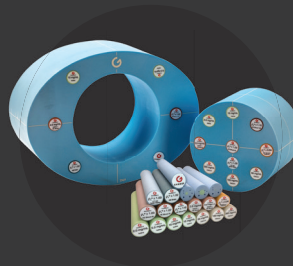

Mercury 4.0 Phantom

Address needs for advanced CT image quality assessment and automatic exposure control

RapidCHECK™ Diagnostic QA Software

Automate your Diagnostic QA workflow for enhanced consistency

Multi-Energy CT Phantom

Verify your CT scanners quantify material classification
